

NLP Practitioner Certification Course

In-depth 4-weekend training in Neuro-Linguistic Programming (NLP) that will take you far beyond the old overused burnt-out techniques of the past. We will introduce you to new skills on a systematic basis, added to what you already possess, and integrate these skill sets to achieve flexibility and elegance. The information is sequenced carefully to provide maximum understanding and develop high-level communication and personal excellence skills. What you will learn will be demonstrated and installed in both personal and business context.

Find out how NLP tools are an absolute must to guarantee your success and they will help you define and design your intentional outcomes. Whether you are a business professional, educator, counselor, consultant, coach, attorney, real estate agent, sales rep, multi-level marketer, or trainer; whether you are interested in NLP for your personal relationships, as a parent or student - we will show you the communicative skills to a higher level of personal excellence in today's challenging environment.

What is NLP?

NLP is a proven technology for personal achievement which helps people to understand themselves and those around them more fully, in such a way as to maximize personal growth and excellence. How are great communicators able to communicate so effectively? What are the decision and motivation strategies necessary for effective leadership? How do people who are so good at what they do become so good and maintain that level through time? What are the thinking patterns that successful people use in the pursuit of their activities, their passions, and their mission in life? NLP seeks to understand the natural learning processes of how great achievers consistently produce excellent results.

What is the NLP Practitioner Certification Training?

The NLP Practitioner Certification Training is a first (introductory-level) course which enables the participants to fully understand and utilize NLP technology in their professional and work situations, as well as for their own growth, development and personal achievement. Completion of the practitioner-level training is an important step towards NLP competence, as well as a prerequisite for many of the other advanced NLP trainings that are offered. One logical follow-on to the practitioner-level training is the NLP Master Practitioner Certification Training. This is an advanced training that continues to build on and enhance the skills already acquired through the practitioner training, and enables the participants to move well ahead on the road to NLP mastery.

Training Format

Our trainings are highly experiential in nature. You will spend only about one third of your time in a lecture format. The balance is a combination of a demonstration of a particular process and practice using the process in a small group format. A typical day begins with an overview of the training objectives for that day, and a description and outline of the first element to be covered, followed by demonstration and exercise. Exercises are designed to create an initial learning experience sufficient for you to continue learning on your own and in study groups. You will receive plenty of practical experience in order to make the NLP skills an automatic part of your behavior.

A comprehensive training manual will be provided to guide participants through the course. The NLP Practitioner Certification will be awarded to participants who successfully demonstrate competence in understanding and utilizing NLP techniques. Your progress and skill level will be monitored throughout the program with feedback and support given to help you reach a high level of proficiency. Each participant's successful completion of this course at the level of NLP Practitioner is granted certification as outlined by the Society of Neuro-Linguistic Programming, and will give you admission to other national and international leading NLP institutes for additional education and training.
